

Advance-Nilfisk Parts

Imagine how long and tiresome it would really be to tidy up right after a party, without help from equipment. Not too long ago, the dirt from upholstery and carpets had to be beat out of them manually; brooms, brushes and cleaning cloths were the best cleaning products during that time.

The man who established Nilfisk-Advance, P.A. Fisker, started out as an electrical engineer who really liked to work on electrical motors. After founding his business in 1906, he started to make motors to drive drills, coffee grinders, fans and machine tools. Mr. Fisker's vision from the beginning was to have a global company advertising goods worldwide.

The Nilfisk C1 was a remarkable breakthrough for the cleaning trade. This ground breaking vacuum cleaner, invented by Mr. Fisker, weighed just 17.5 kilos and could be operated by a single individual. This invention came in a time where other cleaning equipment were massive and needed at least 4 operators, hence, the Nilfisk C1 transformed everything and developed the method we clean forever. The mastermind behind these very first cleaning equipment remains unparalleled. Cleaning equipment offer a brilliant solution to an ongoing dilemma; things get filthy and have to be cleaned on a regular basis, without too much effort.

Slowly but progressively, Nilfisk-Advance grew through the decades. In the 1980s, this development truly took place when the business became a part of the NKT Group. Their new owners' determination and concentration made Nilfisk-Advance take a huge leap forward within the trade, trying to be among the biggest universal players in the market of professional cleaning machines. Nilfisk-Advance is currently located in every part of the world by gradually acquiring many smaller businesses so as to grow their product portfolio and presence in new markets. They are really proud to present a range of cleaning solutions to meet each requirement.
