

Clark Forklift Parts

Performing globally, there are now 350,000 Clark forklifts and lift vehicles in operation, with more than 250,000 of those in service in North America. Clark has five major lines of lift trucks across the world, making it one of the most expansive organizations in the industry. Heavy duty trucks ranging from 1,500lb to 18,000lb capacities, dual fuel, petrol, LPG, hand powered lift trucks, narrow-aisle stackers and electric riders are some of their specialties.

Clark Totalift, handles more than 120,000 specialized items designed for 20 exclusive designs of lift trucks and automated equipment. Your local Clark Seller is your total source for availability of all your parts requirements offered by Clark Totalift.

Clark's phenomenal Parts Distribution Facilities are conveniently located in Louisville, Kentucky, which serves both their consumers and sellers in North America, and Changwon, South Korea, which handles their Asian sellers and customers. For over 90 years, Clark has exceeded industry standards, being one of the most actively advancing manufacturers. Motivated to supply the highest level of value and service to our users, Clark remains on the leading edge when it comes to improving efficiency and benefiting performance.

Clark Totalift has a really impressive worldwide support network. With over 550 locations globally, seller representation in over 80 nations and 230 locations in North America, their high level of dedication to their consumers predominates the materials handling industry.

Clark proudly remains an progressive leader of the material handling industry, pioneering protection features such as the operator restraint system. This exceptional commitment to safety is currently a standard feature on every forklift.

Clark has a unyielding mission to have the No. 1 quality system in the industry which is demonstrated by their dedication to ISO standards. Clark, is the first manufacturer of forklifts and lift vehicles to be globally certified with quality standard ISO 9001 in all of its production plants. Also, the ISO 14001 Environmental Management System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement allows Clark to be ready for any number of environmental limitations, thus placing them in a dominant industry position.

Clark has selected the structure of "Lean Manufacturing" at all of its assembly facilities because this system is particularly economical and allows for minimal use of resources. Established to ensure maximum proficiency, this system is intended to find and acknowledge the most efficient methods for manufacturing facility management. Clark has concluded this transition of its Korean facility. COPS which is Clark Optimized Production System, equally focuses on quality of product and services and manufacturing efficiencies.

Clark's product engineers and suppliers communicate together to perfect the proficiency and brilliance of their products while minimizing costs. The new value engineering agenda combines innovative product improvement and offers improved consumer support and service within the industry.
