

Aerial Work Platforms

There are a lot of accessories meant for forklifts which could be utilized to be able to help expand the functionality of your lift truck and allow you to pick up things, handle materials with out difficulty or to complete clean-up jobs.

Some accessories were particularly intended for the forks themselves. For instance, fork extensions are utilized if you need more blade length, that increases lifting capability. Blade extensions come in lengths varying from 48-120 inches. Rounded or triangular attachments are another variety used when transferring rolled material so as to ensure it does not roll off of the typical flat forks.

Lifting attachments could be pivoting and telescoping crane attachments. They come in numerous styles. These attachments are usually meant for moving metal bars, poles, lumber or whichever kind of bulky stuff. Other attachments like various styles of hook plates and hooks are accessible to pick up stuff using a chain or sling. Slab lifters and magnetic filters are other objects which can be utilized together with hook attachments. Slab lifters are specialized accessories which are intended for lifting different materials which are delivered in a sheet or slab format. Carpet poles and rug rams are other lifting tools that attach to your lift truck to make transferring rolls of carpet easier. The attachment connects onto the forklift's blades and has a pole which goes through the center of the carpet roll.

There are various types of forklift accessory intended for facility maintenance like for instance snow blades. These industrial blades could be connected to front end loaders and utilized for moving materials like for example snow, dirt as well as mulch. Other common cleanup accessories include standard sweepers and magnetic sweepers. Standard sweepers consist of a broom which the lift truck blades hook onto for sweeping large spaces like factory floors, parking lots and warehouse. The magnetic sweeper is similar except that it has a magnetic plate rather than bristles. The magnetic sweeper is utilized in places where there is lots of metal fragments such as on shop floors for instance. Sweepers have widths up to 60 inches and this surface area makes clean up quick and effortless.

Material spreaders are other attachments used on forklifts. These spreaders are helpful for a variety of applications like for instance spreading seeds, ice melt, rock salt, pellets, fertilizers and insecticides.

Work platforms are another optional lifting accessory which many businesses make use of daily. The platforms range in size from 36" x 36" to up to 60" x 60". There are some models obtainable that are capable of folding up and storing into a smaller space. Work platforms are designed to raise employees up to an overhead location making use of the lift truck. Larger platform units have additional space for staff so as to bring tools and other necessary things meant for the job. Normally work platforms are made of steel or ploy material.
